Moonlight Pond Tour & After Party

Please join us for a fantastic evening of fun and nature as you tour some of the most unique outdoor entertaining spaces in St. Louis. This self-guided tour is a tremendous opportunity to see four special spaces that will make you gasp and keep your interest the entire evening. Below is a sneak peek of the features hosting this year's Moonlight Tour. Please mark your calendars, tell your family and friends, and come out to enjoy this amazing evening with us. We look forward to seeing you on September 30th.

STOP #1 | Zip Code 63117 | 5:45 - 6:45 P.M.

This wonderful 10' x 12' pond boasts an 8' stream and waterfall. The feature is nestled into a corner of the yard that is surrounded by evergreen trees that set the stage for the natural setting. Beautiful weathered limestone boulders adorn the feature and make it appear as if it has always been there. The ledge rock feeding stone allows for easy access to view the pond as well as a great way to feed the fish. The covered patio & fireplace is a perfect place to enjoy the space during all times of the year as the sounds of the waterfall fill the space. Park in front of the home and walk to the right side of the house to access this exceptional water feature.

STOP #2 | Zip Code 63119 | 6:30 - 7:30 P.M.

This very unique 45' x 50' recreational pond with an 8' deep section provides the perfect place to take a refreshing dip off the jumping rock on a hot summer's day. Weathered sandstone boulders create a beautiful framework for this feature. The pond has a large wetland filter and several waterfalls that immerse you in a symphony of cascading waterfall sounds. A beautiful set of ledge rock steps provides easy entry and exit from the pond. Fish, plants and many other features in the surrounding garden set the scene for this aquatic oasis. A gas fire pit, flagstone patio and gas tiki torches make this a haven in the evening to enjoy this space. This feature has never been on tour and this is the first time it has ever been shown to the public. This was one of the first viral videos that Greg Wittstock 'The Pond Guy' ever had gone viral in his early days of vlogging. Come see this incredible creation that stretches the imagination of what possibilities there are with water gardening.

STOP #3 | Zip Code 63127 | 7:15 - 8:15 P.M.

This custom pondless waterfall was created in place of an old pond & waterfall that were removed. The waterfall is approximately 20' wide and over 28' long, with a total elevation change of 13' and the first 10' of it was over a 1 to 1 slope. It has 2 Signature 6000 Biofalls filters that start the feature, 3 pumps, 2 pondless vault boxes and over 48 tons of massive Missouri weathered limestone moss rock. The waterfall is positioned in a perfect spot to be enjoyed from inside the dining room as well as the screened porch. This feature has so many details and waterfalls it is almost impossible to list them all, MUST SEE in person to appreciate!

STOP #4 | Zip Code 63127 | 8:00 - 10:00 P.M.*

Welcome to Fox Mountain Falls! This recreational pond is the owner's dream come true. 350+ tons of weathered limestone boulders were used to create this feature. Several massive 9+ ton specimen stones were strategically placed to create scaled focal points. The pond measures approximately 120' by 60' and is over 8' deep. A bluff was created with 8+ ton specimen boulders that serve as not only a unique observation point but also a jumping cliff. A RainXchange system irrigates raised vegetable beds with a permeable paver patio and a custom bubbling rock. The deck has been upgraded with a covered pavilion. A new feature has been added to this feature to increase the enjoyment of the space. A shallow sundeck was added off the cantilevered patio. This modern infusion blends spectacularly with the natural pond. A bubbling rock & spillway bowl add sound and visual interest. New steps into the pond allow easy access to the feature and into the pond. A very cool way to merge modern and natural design that has to be seen in person to appreciate.

*Pond Central: This is the final stop where the tour will conclude with food and refreshments provided by Nature's Re-Creations. Bandana's Bar-B-Q will be served along with dessert and refreshments.
